

Fillable Form Instructions

Download and fill-in your forms electronically!

Fillable forms allow you to enter information while the form is displayed by an Adobe product such as Acrobat or Reader 8.0 or greater product and then print out the completed form. The fillable forms give you a cleaner, crisper printout for your records and for filing with the Retirement Systems Alabama. There is no computation or verification of the information you enter. You are responsible for entering all required information. **You must still print, sign, date, in some instances have the form notarized, and mail in the form.**

Completing your fillable forms - Select a fillable form from the list shown on the various forms pages. Use Adobe Acrobat or Reader to open the file (your browser may be configured to open the file automatically upon download). You can navigate through the form using the tab key or by selecting fill-in areas with your mouse. **Note:** Use your mouse to select an area of the form that does not have a fill-in area before printing your document. If a fill-in area is active (contains the blinking bar) the contents will not print.
