INSPIRA  
INTAL  
**ipratropium bromide**  
ISMO  
ISOCHRON

The first fill on new prescriptions for maintenance medications is limited to a 30 day supply. After the first fill, members can receive a 90 day supply for an approved maintenance medication when the prescription is written as a 90 day prescription and no more than 130 days have lapsed between fills at the local participating retail pharmacy.

The following DIABETIC SUPPLIES are covered under the maintenance drug benefit of your PEEHIP medical plan: Blood Glucose Test Strips; Injection Devices; Insulin Syringe/Needle U-100; Insulin Pen Needles; Ketone Test Strips (urine); Lancets. Retirees who are Medicare eligible members must receive their Blood Glucose Test Strips and Lancets under Medicare Part B. These products are not covered under the PEEHIP prescription drug benefit for members who have Medicare as primary coverage.

**KEY: Generic drugs** are in bolded lower case text and **BRAND-NAME** drugs are in upper case text.  
The symbol \* next to a drug signifies that it is subject to non-formulary status when a generic is available throughout the year.

**For the member:** Generic medications contain the same active ingredients as their corresponding brand-name medications, although they may look different in color and shape. They have been FDA-approved under strict standards.

**For the physician:** Please prescribe preferred products and allow generic substitutions when medically appropriate. Thank you.
