

# PEEHIP 2011 Formulary (Preferred Drugs)

The following is an abbreviated version of the PEEHIP formulary which lists the most commonly prescribed drugs that are at the core of your pharmacy benefit plan. All strengths and dosage forms of a drug may not be formulary. PEEHIP will generally cover drugs in the formulary as long as the drug is medically necessary, is filled at a participating pharmacy, and other PEEHIP plan rules are followed. The list is not all-inclusive and does not guarantee coverage. You are encouraged to ask your doctor to prescribe generic drugs whenever appropriate.

Copays are \$6 for generics, \$40 for formulary (preferred) drugs, and \$60 for nonformulary (nonpreferred) drugs. Prescriptions for a one month supply will be limited to a 30 day supply.

The first fill on a new prescription for maintenance medications is limited to a 30 day supply. After the first fill, members can receive a 90 day supply for an approved maintenance medication when the prescription is written as a 90 day prescription as long as no more than 130 days lapses between fills at local participating retail pharmacy.

KEY: Generic drugs are in bolded lower case text and BRAND-NAME drugs are in upper case text. (M) = Maintenance Drugs; (S) = Step Therapy Drugs; (P) = Prior Authorization Required Drugs; (C) = Specialty Drugs required to be filled at BioScrip Pharmacy; \* Drug is subject to nonformulary status when a generic is available throughout the year; \*\* Benefits for medications for infertility treatment are provided with a 50% copayment up to a lifetime maximum payment of \$2,500.

**For the member: Generic medications contain the same active ingredients as their corresponding brand-name medications, although they may look different in color or shape. They have been FDA-approved under strict standards. For the physician: Please prescribe preferred products and allow generic substitutes when medically appropriate. Thank you.**
