

How to Use the Formulary

The Formulary is a list of medications available to PEEHIP members under their pharmacy benefit. All drugs are listed by their generic names and most common proprietary (branded) name. The Formulary may be accessed by using the index, either by generic or proprietary name and by therapeutic drug category. In situations where an FDA approved generic equivalent is available, brand names are listed for reference purposes only, and do not denote coverage for the brand, unless specifically noted.

All drugs are listed in each category in alphabetical order by generic name. Where an FDA approved generic is available for the listed generic name, the generic name is italicized.

For certain agents within the Formulary, a recommended prescribing guideline may apply. These are denoted throughout the document using the following symbols:

Table with 3 columns: Symbol, Guideline, Description. Rows include ACA (Affordable Care Act), MO (Maintenance Medication), OTC (Over-The-Counter), PA (Prior Authorization), QL (Quantity Limit), and ST (Step Therapy).

The Formulary applies only to outpatient drugs provided to members, and does not apply to medications used in inpatient settings. If a member has any specific questions regarding their coverage, they should contact Express Scripts at (800) 363-9389.

The following topics may apply:

1. Generic Substitution

When available, FDA approved generic drugs are to be used in all situations, regardless of the brand name indicated. The generic names are italicized in the formulary listing wherever an FDA approved generic drug product is available. Greater economy is realized through the use of generic equivalents. This policy is not meant to preclude or supplant any state statutes that may exist. All drugs that are or become available generically are subject to review by Express Scripts Pharmacy and Therapeutics Committee.

This list is reviewed and updated periodically based on the clinical literature and pharmacokinetic characteristics of currently available versions of these drug products.

If a member or physician requests a covered brand name product in lieu of an approved generic, the member, based upon their coverage, will typically be required to pay the difference in cost between the brand and the generic. If a physician determines that there is a documented medical need for the covered brand equivalent, the member should contact Express Scripts for details on submitting a copay exception request at (800) 363-9389.

2. Tier Benefit Design

The Formulary may be applied to a tier benefit design, where the member shares the cost of prescription drug therapy based on the drug's tier and copayment or coinsurance. In most instances, generically available drugs will be covered in a separate lower tier (low copay), preferred branded drugs listed on the Formulary will be covered on Tier 2, non-preferred brand drugs will be covered on Tier 3, Specialty generic drugs will be covered on Tier 4, Specialty preferred brand drug will be covered on Tier 5, and Specialty non-preferred brand medications will be covered on Tier 6.

Tier Definitions:

- Tier 1: Generic medications
Tier 2: Preferred brand medications (formulary agents)
Tier 3: Non-preferred medications (non-formulary agents)
Tier 4: Specialty generic medications
Tier 5: Specialty preferred brand medications
Tier 6: Specialty non-preferred brand medications

3. Medication Request Process

Depending upon plan benefit design, a medication request process may apply as follows:

A. Coverage Exceptions

Drugs that are listed in the Formulary with associated Prior Authorization (PA) require evaluation. Each request will be reviewed on an individual patient need basis. If the request does not meet the established guidelines the request will not be approved and alternative therapy may be recommended.

Non-approved requests may be appealed. The prescriber must provide information to support the appeal on the basis of medical necessity. Prior Authorization is generally not available for drugs that are specifically excluded by benefit design.

4. General Exclusions

- A. Over the Counter (OTC) medications or their equivalents, unless the individual's pharmacy benefit offers coverage of OTC medications.
B. Any drug products used for cosmetic purposes.
C. Experimental drug products or any drug product used in an experimental manner.
D. Replacement of lost or stolen medication.
E. Non self-administered injectable drug products unless otherwise specified in the Formulary listing.
F. Foreign sourced drugs or drugs not approved by the United States Food & Drug Administration, except in certain cases of drug shortage, when allowed under the individual's pharmacy benefit.
G. Drugs specifically used for the treatment of erectile dysfunction.

Table of Contents
