

Questions of Clarification
RFP RE22-006 Architectural/Engineering Professional Services

1. Will the resulting contract include work for maintenance projects, miscellaneous hourly RSA maintenance staff assistance, very small TI stuff, etc., or only substantial projects? If a proposed fee basis for these miscellaneous work terms will vary, must we delineate them in detail?

Answer:

The proposal should include your proposed fee structure and rates. This should include the hourly rates, percentages of project value and any other information deemed important to be included. If fees vary based upon type of work performed, that must be reflected in your fee structure and rates. The proposal is a basis for selection and the final contract specifics will be negotiated
